Re: 2013 Annual Key Well Sampling – former York Naval Ordnance Plant (fYNOP)

Dear Ms. Trowbridge and Mr. Miller:

We recently completed the “Groundwater RI Part 2 Comprehensive Sampling Round 1” as described in Addendum #10 of the “Field Sampling Plan for Part 2 of the Supplemental Groundwater Remedial Investigation” (GSC, July, 2013). We are in the process of validating the laboratory data, after which we will make the data available to you in table form as an Interim Data Report and through our web site www.fynop.com. This data will, of course, be incorporated and discussed in a final report that is currently scheduled to be completed in December of 2014.

With the groundwater quality data soon to be available for your review as discussed above, we propose that a separate annual key well report for 2013 not be completed. If you have concerns regarding this recommendation, I am available to discuss this with you. Please do not hesitate to contact me at (717) 901-8187.

Sincerely,
GROUNDWATER SCIENCES CORPORATION

Stephen M. Snyder, P.G.
Senior Associate
