III. Holding Times

VOC - Waters - unpreserved: aromatic within 7 days, non-aromatic within 14 days of sample collection

VOC - Waters - preserved: aromatic and non-aromatic within 14 days of sample collection

VOC - Soils - preserve or analyze within 48 hours of sample collection; analyze within 14 days of preservation

SVOC, Pest., PCB - Waters - extract within 7 days of sample collection, analyze within 40 days of extraction SVOC, Pest., PCB - Soils - extract within 14 days of sample collection, analyze within 40 days of extraction

					//				

- 1. If preserved samples exceed holding time, qualifty all associated results as estimated (J/UJ).
- 2. If unpreserved samples exceed holding time, qualify all associated results as unusable (R).
- 3. If holding times are exceeded by more than 2X, reviewer may qualify non-detected results as unusable (R)
- 4. If water samples are not acidified, use professional judgement. Minimally, qualify data as estimated (J) and non-detects unusable (R).
- 5. If soil samples exceed holding time, use professional judgement to qualify data.

Remarks:		
	 	 .

III. Holding Times

Sample should be preserved and analyzed according to the appropriate analytical method in general the following preservations and holding times for waters can be applied:

Sulfate, 4 degress C, 28 days

Sulfide, 4 degrees C, pH ≥9 with zinc acetate/sodium hydroxide, 7 days

Bromide/Chloride/Fluoride, no preservative required, 28 days

Nitrate/Nitrite or Ammonia, 4 degrees C, pH ≤ 2 with sulfuric acid, 28 days

Nitrate or Nitrite, 4 degrees C, 48 hours

Alkalinity, 4 degrees C, 14 days TDS/TSS, 4degrees C, 7 days

Phosphate (total), 4 degrees C, pH < 2 with sulfuric acid, 28 days

Hexavalent Chromium, Cool 4 degress C, water- 24 hours, soil - 30 days

- 1. If holding times are exceeded, all results are qualified as estimated (J/UJ)
- 2. If holding times are exceeded by more than 2X, reviewer may qualify non-detected results as unusable (R)
- 3. If samples were not properly preserved, use professional judgement to qualify the data

Remarks:

VI. Blanks			Page	6 of 11
All blanks wer	Cs and CVOCs Yes	No	el for each 12 hour period on each GC/ List documented contamination below:	
Laboratory	Method Blanks:			
Date:	Lab ID #	Fraction	Compound	Conc. (ppb)
Associated	Project Blanks (e.g., eq	uipment rins	ates, trip blanks, etc.)	
Associated Date	Project Blanks (e.g., eq	uipment rins Fraction	cates, trip blanks, etc.) Compound	Conc. (ppb)
<u>Date</u>	Lab ID#	Fraction	Motheler Chlerite	Conc. (ppb) 0,27 0,353
<u>Date</u>	Lab ID#	Fraction	Motheler Chlerite	0.27
<u>Date</u>	Lab ID#	Fraction	Motheler Chlerite	0.27
<u>Date</u>	Lab ID#	Fraction	Motheler Chlerite	0.27
<u>Date</u>	Lab ID#	Fraction	Motheler Chlerite	0.27
<u>Date</u>	Lab ID#	Fraction	Motheline Chlorite	0.27
Date 3/17/15 -3/23/15	Lab ID#	Fraction 190C Voc	Motheline Chlorite	0.27
Date 3/17/15 -3/23/15	Lab ID#	Fraction 190C Voc	Motheline Chlorite	0.27

VI. Blanks (continued)

Calculate action levels based on 10X the highest blank concentration of "common laboratory solvents", VOCs (methylene chloride, acetone, toluene, 2-butanone, cyclohexane) or SVOCs (phthalates), and 5X the highest blank concentration for all other VOC, SVOC, Pesticides, and PCB compounds. Sample weights, volumes, and dilution factors must be taken into account when applying the 5X and 10X criteria. This allows the total amount of contaminant present to be considered.

Deviations:

Compound	Maximum Conc.	Action Level (ppb)	Samples Affected
Compound	Detected, (ppb)		
matyhan delantes	0.27	2,7	5, 1, 2, 3 4x 566 bolow =
ms Hylm chloric	0,353	3,53	11
		<u> </u>	

- 1. If compound results exceed the action levels, the data are not qualified
- 2. If compound results are below the required reporting level, report results as non-detect (U) at the reporting level
- 3. If the compound is detected above the reporting level, but below the action level, qualify as not-detected (U)
- 4. If gross contamination exists in blanks (i.e.,, saturated peaks by GC/ MS), all affected compounds in the associated samles should be qualifed as unusable (R) due to interference.
- 5. If blanks were not analyzed per matrix per concentration level for each 12 hour period on each GC/MS system used to analyze VOCs and SVOCs use professional judgement to qualify data. Data may be rejected (R).
